***EXAMINER'S COMMENT***

1. The Notice of Allowance is responsive to applicant's amendment filed 3/19/2007. The amendment and arguments see pages 1-3, filed with respect to the Double Patenting has overcome the rejections of claims 1-10 mailed on 1/26/2007. Therefore, the Double Patenting rejection of claims has been withdrawn. The correction of the Abstract is also acknowledged.

2. The following is a statement of reasons for the indication of allowable subject matter:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest a method of destroying formation in a body comprising the steps of introducing a tubular member into a body with gripping means provided at a front end of the tubular member and having a plurality of gripping elements which are movable between an open position in which the gripping elements are spaced from one another around an axis of the tubular member and a closed position in which the gripping elements are located close to one without gaps therebetween to enclose a substantially closed space and where destroying the formation by a formation destroying element which is introduced through an interior of the tube and therefore into an interior of the tubular member with a working head brought in contact with the formation and rotatable to destroy the formation.
